GSD Capture Tester Guide

Set it up once, then capture tasks, reminders, and calendar events by voice.

What you need

- An iPhone with Apple Shortcuts.
- A personal or work Microsoft account with Microsoft To Do and Calendar access.
- An internet connection during setup and voice capture.

Keep your Voice Capture key private. Do not send it in a screenshot, text message, or feedback report.

First-time setup

1	Open GSD Capture in Safari Go to https://gsd-capture.vercel.app
2	Add it to the Home Screen Tap Share, choose Add to Home Screen, then tap Add.
3	Connect Microsoft To Do Open Settings, tap Connect Microsoft To Do, sign in, and accept the requested permissions.
4	Set up Voice Capture Tap Set Up Voice Capture and complete the Microsoft approval.
5	Copy your private key Tap Copy Voice Key. This key belongs only to your setup.
6	Install the shared Shortcut Tap Install Capture Shortcut and paste the key when asked. During beta, it may initially display as GSD Voice Capture; rename it to Capture if needed.
7	Run one test Say: Get a quote from the packaging supplier. Then check GSD Review and Microsoft To Do.

Four beta tests

SAY THIS	EXPECTED RESULT
Capture buy printer paper.	A task appears in GSD Review and Microsoft To Do.
Get a quote from the packaging supplier.	GSD suggests Purchasing, shows confidence and an explanation, and waits for approval.
Remind me tomorrow at 8 AM to call the supplier.	The task has a Microsoft To Do reminder for the requested time.
Add a dentist appointment Friday at 2 PM for one hour to my calendar.	A Microsoft calendar event is created and appears in Apple Calendar when that Microsoft calendar is enabled on the iPhone.

Reviewing a capture

1	Open Review Open GSD Capture and choose Review.
2	Refresh Tap Refresh if the new capture is not visible yet.
3	Read the suggestion Review the suggested folder, confidence, explanation, and scheduling details.
4	Choose an action Approve the suggested folder, choose another folder, or keep it in GSD Review.
5	Verify Microsoft Confirm the task moved to the correct Microsoft To Do list.

Account separation check: A tester should only see their own GSD Review items, Microsoft To Do tasks, reminders, and calendar events.

Troubleshooting

The Shortcut says the key is invalid

Open GSD Capture Settings, copy the Voice Key again, and replace the x-gsd-capture-key value inside the Shortcut.

The task is in Microsoft To Do but not GSD Review

Confirm Voice Capture shows Connected in the same GSD app. Open Review and tap Refresh.

Microsoft is disconnected

Reconnect Microsoft To Do, choose Set Up Again under Voice Capture, and update the Shortcut with the new key.

The calendar event is not in Apple Calendar

On iPhone, open Settings > Apps > Calendar > Calendar Accounts, select the same Microsoft account, and enable Calendars.

Still stuck

Open Setup help and recovery in GSD Settings and tap Copy Safe Support Details. Send those details with a screenshot that does not show the Voice Key.

Feedback to send Brian

What I said:

What I expected:

What happened:

Did it appear in GSD Review? Yes / No

Did it appear in Microsoft To Do or Calendar? Yes / No

Screenshot attached: Yes / No (Voice Key hidden)

Current beta limitations

- Voice capture requires an internet connection.
- Calendar events are created in Microsoft Calendar and sync to Apple Calendar when that account is enabled.
- Recurring schedules and complex repeating reminders are not yet the focus of this beta.
- The typed task box is available, but this beta primarily tests the iPhone voice Shortcut.
- During beta, the shared Shortcut may initially display as GSD Voice Capture until the final renamed link is published.

Quick privacy reminder

The Voice Capture key acts like a private password for the Shortcut. Never share it. Safe Support Details intentionally exclude it.
